

Kronoplus worktops have been awarded the FIRA Gold Award for technical excellence, and are suitable for all kitchen applications. Kronoplus worktops are highly resistant to high temperature, impact, abrasion and staining.

Kronospan Worktops meet the following standards:

Laminate conforms to BS EN 438

Laminate/Substrate adhesion conforms to BS 6222 Part 3

Coreboard conforms to BS EN 312

All Kronospan Worktops achieve the Class E1 standard of ≤ 8 mg/100g for formaldehyde.

Care of Kronospan Worktops

- Always use a chopping board. Do not use sharp knives directly on the laminate surface. If the surface is scratched then a light application of furniture polish may hide fine scratches.
- Do not place hot pans or dishes directly onto the worktop surface. Excess heat can cause blistering and cracking of the laminate.
- Do not use abrasive cleaners that can scratch the laminate surface, and do not expose the worktop to household bleach for prolonged periods as this may cause discolouration.
- Wipe up spills immediately and ensure all cleaning residues are removed.

Kronospan Worktops Quality Guarantee

- Kronospan Worktops are manufactured under a quality system independently certified to ISO 9001:2000.
- Kronospan will undertake to replace any Kronospan Worktop that is found to be defective in either material or manufacture for up to one year from purchase.

KRONOSPAN WORKTOP SIZES:

THICKNESS	Size
28, 38mm	3000 x 600
38mm	3000 x 900
